General:

- Vertical cutting machine with patented and reliable KR cutting system for a perfect cutting result
- Gently transport of the product in vertical position between two conveyor belts
- Cutting ensues via a vertical blade
- Adjustment of the cutting position ensues via adjustable side conveyor belts
- Two knife variants: with and without counter bearing
- The blade for the hinge-cut is also adjustable in the height
- therefore, selectable if hinge-cut or complete cut-through
- the product lays with the cutting surface up, after the complete cutting through, the position, which is most suitable for a further processing

Highlights:

- hygienic design, designed and constructed as “wash-down” version for an intensive wet cleaning
- equipped with casters/wheels for enhanced mobility
- adjustment of the working height via spindle height adjusting
- design complete in stainless steel and food safe plastic (blue)
- machine housing completely closed, for achievement of highest security standards (OSH/OHS)
- self-monitored machine

Operation:

- the cut is made in a continuous process
- products will be placed on the front of the machine and come out sliced on the back
- cutting speed is adjustable from 4 m/min to 10 m/min
- adjustment of the cutting position is effected by handwheel with scale of position

Technical data:

Length: 2260mm

Width: 700mm

Height: 1420mm

Weight: 290 kg

max. width (product): 180mm

max. height (product): 140mm

current supply: electrical connection
400V / 50Hz
3Ph +N + PE
