

The Formatic forming machine is designed to grow with your business; and is suitable for a variety of mixtures and consistencies, including soft or firm doughs. These machines are ideal for making cookies (small or large particulates); granola bars; dog bones; horse treats; meat, fish, potato, or vegetable paddies; play-dough, gluten free products and more! The machine uses synchronized paddles to gently press mixture into shapes via a rotating drum. Products are then released from the drum with the assistance of a wire drum scraper and placed on a conveyor belt for panning, freezing or additional processing.

## R-Series

The Formatic R-Series, proudly manufactured by Deighton, is Erika Record Baking Equipment's most popular Formatic offering with maximum output ranging between 2,400 - 8,800 units/hour. This machine is ideal for mid-sized bakeries that are seeking to increase production.

This model is capable of producing forms up to 4.25" in diameter with a **standard drum** and a maximum thickness of up to .75." **Deep drop drums** allow the R-Series to achieve a minimum thickness of .25" with a maximum of 1.25." Lastly, when creating small products, the machine is capable of dropping two or three peices at once.

Model	Electrical	Weight (lb.)	Hopper Capacity (lb.)	Measurements L x W x H (in.)	Max Output*
R1200	110v, .75kw, 1Φ	220	25	28 x 26 x 36	2,400/hour
R2200	220v, 1.1kw, 3Φ	220	25	28 x 26 x 36	4,400/hour

\*Maximum output assumes a standard one-on, 180 degree drum is used in production. This number may vary with form size and shape.

Erika Record Baking Equipment maintains a wide variety of standard drum dies in stock. For clients with unique design requirements, we also facilitate the purchase of custom dies.

# DEIGHTON

# HIGH PRODUCTION

## Traymatic

The Traymatic has the same ease of use as the traditional Formatic series, with additional features designed to facilitate increased production. This includes an Automatic Panning System, which accurately deposits formed cookies and food items onto 18" x 26" sheet pans.

This machine utilizes a drum for a Formatic C-Series and is capable of producing and automatically panning upto 6,000 forms/hour.

Model	Electrical	Weight (lb.)	Hopper Capacity (lb.)	Measurements L x W x H (in.)	Max Output*
Traymatic	220v, 1.9kw, 3Φ	552	44	73 x 43 x 80	6,000/hour

*\*Maximum output assumes a standard one-on, 180 degree drum is used in production. This number may vary with form size and shape.*

## DD 12,000

The DD 12,000 offers the greatest output of all the Formatic machines. This machine is suitable for forming a wide range of product types in varying sizes and shapes in a high capacity, high output environment. This includes bakeries, food processing plants, and other food manufacturing facilities.

This unit is capable of producing forms up to 5" in diameter at a rate of 24,000 - 48,000 forms/hour.

Model	Electrical	Weight (lb.)	Hopper Capacity (lb.)	Measurements L x W x H (in.)	Max Output*
DD 12,000	220v, 1.76kw, 3Φ	485	440	39.5 x 35 x 84.5	24,000/hour

*\*Maximum output assumes a standard one-on, 180 degree drum is used in production. This number may vary with form size and shape.*

Erika Record is the leading manufacturer and distributor of retail/commercial baking equipment. For over 20 years, we have partnered with our suppliers, including Deighton Manufacturing (producers of Formatic food forming equipment), to provide our customers with both excellent equipment and outstanding customer service.
